

Spokane County Wildfire Debris

Graham Road Waste Acceptance Requirements

Construction & Demolition (C&D) Materials (“Wildfire Debris”)

Required documentation:

- A conventional asbestos survey and/or alternate asbestos survey from an AHERA building inspector showing no asbestos
- An asbestos survey and certification from a certified asbestos abatement contractor that all ACM has been abated

Without the above documentation load will be rejected or must be managed as asbestos-containing waste material (ACM)

Presumed Asbestos Debris

All wildfire generated debris and ash may be considered presumed asbestos containing material (PACM) and managed following the requirements for ACM. Each load must arrive with approved documentation consisting of a completed Waste Shipment Record.

All loads of presumed or known ACM must follow the packaging requirements for acceptance of ACM. The requirements for packaging of these materials are as follows:

Adequately Wet

Generators are responsible to ensure that ACM is adequately wet as required by regulation prior to packaging.

6 mil bags (55gal Max)

All PACM and ACM must be double bagged in a 6 mil bag (55gal Maximum). Each bag must be sealed properly. Each bag must be labeled in compliance with the regulations.

- Labeled bags are available at the scale house.
- Labels must display the following information:

ADDRESS (where the waste was generated)
NAME OF GENERATOR
DATE WASTE WAS COLLECTED (BAGGED)
DANGER
CONTAINS ASBESTOS FIBERS
MAY CAUSE CANCER
CAUSES DAMAGE TO LUNGS
DO NOT BREATHE DUST
AVOID CREATING DUST

Burrito Wrapped Asbestos

Burrito wrapped asbestos must be double wrapped in **reinforced** 6 mil plastic.

Burrito style wrapped asbestos must have the seams glued and taped so they do not leak during transportation or offloading.

Burrito wrapped ACM must be marked in several locations as follows;

ADDRESS (where the waste was generated)
NAME OF GENERATOR
DATE WASTE WAS COLLECTED (BAGGED)
DANGER
CONTAINS ASBESTOS FIBERS
MAY CAUSE CANCER
CAUSES DAMAGE TO LUNGS
DO NOT BREATHE DUST
AVOID CREATING DUST

Any burrito wrapped loads arriving at the facility that are not double wrapped with reinforced 6 mil plastic and properly labeled will be rejected.

Torn or Broken Packaging

When unloading, if at any time your packaging rips, tears or is breached in anyway it must immediately be repaired. All transporters shall carry plastic, tape and glue at all times so the repair can be completed.

Vermiculite Materials

Waste Management requires that all vermiculite be packaged and disposed the same as ACM as described above.

Graham Road Landfill reserves the right to prohibit any company that violates these policies from disposal of PACM or ACM at Graham Road LF. Any clean up or additional work required to dispose of improperly packaged or prepared ACM will be charged at the full rate allowable by law.

Dead animals, electronics, CFC containing appliances, and scrap metal are not acceptable at Graham Road Recycling and Disposal Facility.
