

Do you know where it goes?

Food scraps and yard waste go to the Cedar Grove Compost Facility in Everett where they're made into compost.

Trash goes to the Cedar Hills Regional Landfill in Maple Valley.

Preparation
Each recyclable item must be clean and empty of all debris, food or liquids.

New Recycled Item
Consumers purchase new materials.

Recycling Loop
Recycling works only if all these things happen. It's up to you!

Separation
Recycling goes to the Cascade Recycling Center where items are sorted by category — cardboard, tin, steel, plastic containers, paper, glass.

Markets/Manufacturing
A manufacturer must be willing to buy the material and able to make a new product out of the recycled item.
